

TIME TO RENEW

Is your lawn losing ground to heat, disease, insects or old age? We can give it a fresh start. Our slice seeding system plants seed directly into the soil without removing the existing sod. This assures high germination and fast establishment. For total reconstruction, or if you just need to "thicken up" your lawn, our renewal services will meet your lawn's needs.

Give Your Lawn a Fresh Start This Year

The best way to rebuild a thinning lawn is from the ground up. When renovation is needed, our slice seeding will solve the problem quickly, with little mess or bother. By planting seed directly into the soil, we can deliver very high germination rates and faster establishment.

If your lawn is in need of a fresh start, give us a call today. You, and your lawn, will be glad you did!
