

IT'S TIME FOR A  
FRESH START WITH

# LAWN RENOVATION

# NEW LIFE

Hot, dry weather hurts your lawn, and this summer has broken a lot of records! If your lawn needs more than regular care because of the heat, we can help bring it back to life.

Your lawn renovation needs will depend on your lawn's condition, but may include:

**FERTILIZING** to encourage quick recovery from drought while building the root system with food reserves for the upcoming winter season.

**CORE AERATION** to open up pathways for air, water and fertilizer to reach the roots more easily.

**RESEEDING** to thicken up your lawn. Done with core aeration or with a slice seeder, fall is the very best time of year to get new seed established.

**So if summer weather has done a number on your lawn, call us today for more information on customized lawn renovation services!**
